```
1)
ls .> lista.txt

2)
echo $(whoami) > username.txt

3)
echo $(pwd) >> username.txt

4)
find . -perm 744

5)
find . -perm 744 > test4.txt

6)
ls | grep -v ".tx_" | xargs rm

find -not -name "*.tx_" -delete

find ! -name "*.tx_" -delete

find ! -name "*.tx_" -exec rm {} \;

find ! -name "*.tx_" -exec | xargs rm
```

Άκομψος τρόπος:
```
mkdir testdir; mv *.tx_ testdir; rm *.*; cp testdir/*.* .; rm -r
testdir

7)
#!/bin/bash
for i in {1..5}
do
echo 'OK !!!' > test$i.txt
done

8)
#!/bin/bash
for i in {1..5}
do
echo $i > test$i.txt
done

9)
#!/bin/bash
for i in test/*;
do echo "$i";
done > lista1.txt

#!/bin/bash
```

```
for i in test/*;
do echo "$i" >> lista1.txt
done
```
